## Who We Are

**PYNNAACLE is a multidisciplinary consultancy company based in the UK. We provide independent professional consultancy in a variety of fields such as environmental and natural resources, climate change and renewable energy, planning, and international development consulting, construction and infrastructure.**

We also provide advice and support on a wide range of strategic and site-specific issues, to a diverse and growing base of business, institutional, NGOs, regulatory, and governmental clients while delivering expert advice and project management, monitoring & evaluation services across differing sectors inclusive of climate change and sustainable development initiatives in Africa, renewable & low carbon energy projects, investment initiatives, capacity building, food production & distribution, planning, infrastructure and industrial sectors.

## Our Objective

**PYNNAACLE's main objective is for a globally sustainable development in Sub-Saharan Africa that is inclusive and dynamic through partnering and encouraging enterprise, creativity, diversity and to create awareness for and subscribe sustainable solutions to the environmental impact of Climate Change and the eradication of global poverty.**

We assist our clients to deliver value-enhancing projects in the field of sustainable development while promoting the company's impartial and professional consultancy services at all times.

Combating Desertification & Poverty

Rural Electrification

**SOLUTIONS**

Helping to Combat Climate Change Effects

Reclaiming Desert Sand To Soil Ready for Farming

Solar Farm Energy To Rural Africa

## Africa

A new and evolving paradigm change is emerging in Africa which promises to focus the attention of governments, international development organisations and investors around the world. It is one of the world's fastest-growing regions and one that is poised to become a global player economically. It is a region that we at Pynnaacle know well.

This region has come increasingly into focus over the last decade and can no longer be ignored economically, socially as well as politically. It is a region that we are frequently seeing increased activity by our clients whose growing investments are yielding positive returns.

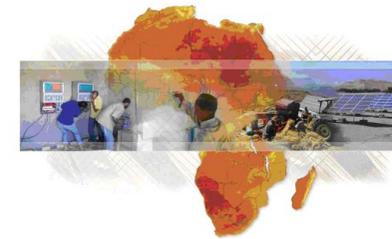

## Growth

Africa is and will remain one of the world's fastest-growing regions for the foreseeable future. Real GDP rose by an average of 5.0% percent per annum from 2000 through to 2016, telecommunications, banking, and retailing are flourishing, construction is booming, private-investment inflows are surging.

Undoubtedly, many of Africa's 50-plus individual economies face serious challenges, including poverty, disease, and high infant mortality, yet Africa's collective GDP at US\$1.6 trillion in 2008, was roughly equal to Brazil's or Russia's. This acceleration is a sign of hard-earned progress and promise.

## Sustainable development

Sustainable development is set to play a major role in Africa's future development. The United Nations' Global Goals for Sustainable Development, which we at Pynnaacle could play a significant role in advising you with your investment in this new emerging market.
